EDITORIAL

This year's East Coast Rally was once again a big success, even though temperatures were in the 90's. The flea market was larger than ever and all of the dealers seemed to be doing a lively business. Dan and Barbara were there from Beachwood Canvas and had with them a large selection of models which they are adding to their line of merchandise. The sun was so hot that some of their models began to melt. They also had a radio controlled M38 which ran all over the flea market area.

We have a parade coming up on July 3 in Fairfield and we thought we might get one for the 4th of July, but we couldn't get one on such short notice. Therefore on the 4th we will just be having the picnic at Bob and Pat Hauck's in Little Falls. Chris Hauck, Tom's wife is coordinating the food. If you haven't yet told her whether you are coming or what you will bring, call her at 748-5027.

For the last two years we have had an excellent fall picnic at Bob Yard's in coordination with the Flemington Fair. Bob has again offered the use of his facilities and we are now working on setting up the exact time and date. It was also suggested at the meeting that we try to set up a scenic trail run on that day if possible.

Vehicles located in Edison.

Dear Friends,

Thank you very much for the planter as a sign of your concern and sympathy on the death of my mother.

The support of good friends makes the adjustment to such sudden problems easier to accept.

I have always valued very highly the genuine concern that each of the MVCC members (and especially those of NJC) has for the needs and welfare of other members. Since I have almost no family in the Eastern U.S.--the warm friends that I have in N.J.C. have been a substitute. I believe that it is their warmth and concern that makes N.J.C. special.

Thank you.
Peter Berendson

A Chapter of the
MILITARY VEHICLE
COLLECTORS CLUB

Mr. James E. Herrick, Secretary/Treasurer
Military Vehicle Collectors Club
P.O. Box 33697
Thornton, Colorado 80233

May 9, 1984

Dear Jim,

The New Jersey Chapter would like to constructively comment on the article entitled "A Dilemma/A Solution", which appeared in the March 16, 1984 issue of "From The Treasurer...".

As you stated, "The production of such a document is a herculeon task for its Editor and staff of just a few people." The members of the NJC realize this, and truely appreciate the group's efforts in the coordination, updating, sorting, and entering of all member's addresses and pertinent vehicle data. Such a unique compilation of data is an achievement for which the MVCC may be proud; and it places us far ahead of many other vehicle collecting organizations.

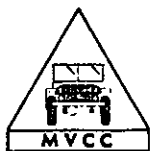

The publication of the new, up-to-date membership directory has been anticipated for some time; however the National's unexpected announcement of a \$12.50 charge certainly took many by surprise. The article gives the impression that decisions pertaining to the directory's format and finances were made entirely within the National. Financial problems or concerns of this magnitude, which no doubt surfaced during the directory's pre-publication planning, should have been outlined and presented (along with any proposed solutions), at the 1983 National Convention. Following this course of action would have not only made everyone aware of the impending decisions (and their resulting consequences), but it also would have allowed all MVCC chapters to voice their opinions concerning "this dilemma"; since in the end, it is the members of the local chapters that will be responsible for providing "the solution".

Sincerely Yours,

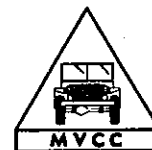

Douglas Stober
Secretary, North Jersey Chapter, MVCC

Scale Military Vehicle Model Shop

Beachwood Canvas Works announces our new line of quality plastic military vehicle models. Since these models may be difficult to obtain at local hobby shops, we've decided to stock the most popular and detailed ones for you. If you have a particular model in mind that we have not advertised, we may be able to special order it.

THINK OF HOW GREAT YOUR DEN WOULD LOOK WITH A DETAILED MODEL OF YOUR FAVORITE VEHICLE!

SHIPPING OF MODELS IN THE CONTINENTAL U.S.:

No additional shipping charges for models ordered with any canvas order (Except for TAMIIYA "WILD WILLY" and M38A1 radio control jeep). If just ordering models, add \$1.50 for the first model and \$0.50 for each additional model. Any excess will be refunded.

1/10th SCALE DYNAMIC AND VERSATILE RADIO CONTROL STUNT VEHICLE

Willys M38 WILD WILLY

READY TO ASSEMBLE MODEL KIT 1/10 SCALE; FORWARD AND REVERSE THREE STAGE SPEED CONTROL. REQUIRES 2 CHANNEL 2 SERVO RADIO AND TAMIIYA (M38) OR SERVOMASTER (M38) SERVO MOTOR AND DIFFERENTIAL GEAR DRIVE. WATER RESISTANT 90C COMBINATION SWITCHES MOTOR AND DIFFERENTIAL GEAR DRIVE. OVERSIZE WHEELS AND SUPER GRIP SEMI-PNEUMATIC SAND TIRES WITH WILD WILLY AT THE WHEEL. BALL JOINT STEERING SYSTEM. FINANCENY CONSTRUCTED FOR LONG LIFE.

(Model Particulars) This model is a new concept in radio control cars, in 1/10 scale size. With its short wheel base and wide tread, it is able to perform dramatic and enjoyable stunt action and also act as a normal off road vehicle when so desired. Overall length 345mm, width 242mm, height 285mm and weight about 2.0kgs (fully equipped). * Wheel base 175mm. Front tread 166mm. Rear Tread 196mm. * Wide tread and short wheel base makes for exciting, stable running on all surfaces plus the ability to do exciting stunts such as spin-lurns, wheelies etc. * Four wheel independent suspension. Front suspension is swing arm type and rear is a single trailing arm. Extremely strong and lightweight nylon parts are used in abundance for ease of construction, long life and extremely rugged use. * Water resistant mechanism box, sealed motor and gear box protects your valuable radio equipment from moisture damage, allowing you to enjoy running the vehicle in all climatic conditions and on wet and muddy tracks. * Smooth running is assured with ball bearings at all four wheels and three, free running, bevel gears in the large differential. Positive traction is obtained during sharp cornering, reducing spin and rolling tendencies due to high center of gravity. * Body styling is based upon the very popular Willy's M38 Jeep, and included is a 1/10 scale figure of "Wild Willy" dressed up in a professional race drivers suit and full face helmet. * Precision ball bearings ensure long life and lasting performance. * Injection moulded body and figure are easy to paint and modify and are protected with a sturdy metal and plastic roll cage.

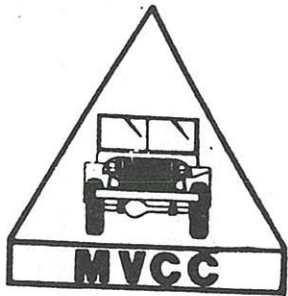

This radio controlled jeep performs so fantastically, that we had to make it available to military vehicle enthusiasts. Besides all of the standard forward, reverse, stop, and variable speed features, you can even get it to perform complete flips! This M38 jeep is more fun than a full size jeep could ever be!

WILD WILLY (Less radio control unit, servo, batteries, and charger).....140.00
 Futaba 2 channel, 2 servo radio control unit.....80.00
 Tamiiya NiCad rechargeable battery.....34.00
 MRC Quick Charger (for use with 12 V automobile lighter).....34.00
 Shipping (Con. U.S.).....26.00
 Total cost.....294.00
